***Response to Amendment***

The following is in response to the amendment filed on August 23, 2004.

***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a method of drawing an optical fiber from a preform whereby during drawing a diameter of the fiber is modified as a function of variations in optical or geometric characteristics of the preform departing from intended design characteristics, such variations having been determined prior to heating the preform and drawing the fiber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

Applicant's arguments filed August 23, 2004 have been fully considered. Upon reconsideration of the prior art applied previously, Presby (US 4,362,943), it is acknowledged that variations in index profile or diameters are measured on the fiber as it is being drawn, and not on the preform prior to drawing of the fiber.

Art Unit: 1731

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pilkington (GB 2 238 536) discloses a method of making optical preforms that corrects for irregularities in the core and clad diameters.
